DISCOVER BATTERY PRECONDITIONING

Your Toyota C-HR+ is designed to make charging simpler and quicker, even in cold weather. One way it does this is with battery preconditioning. This feature gently warms the battery before you plug in, so it's ready to charge at the fastest speed possible. You don't have to think about it much, it works in the background and can be turned on in a few different ways:

From the C-HR+'s multimedia screen. You can manually start or schedule preconditioning before charging

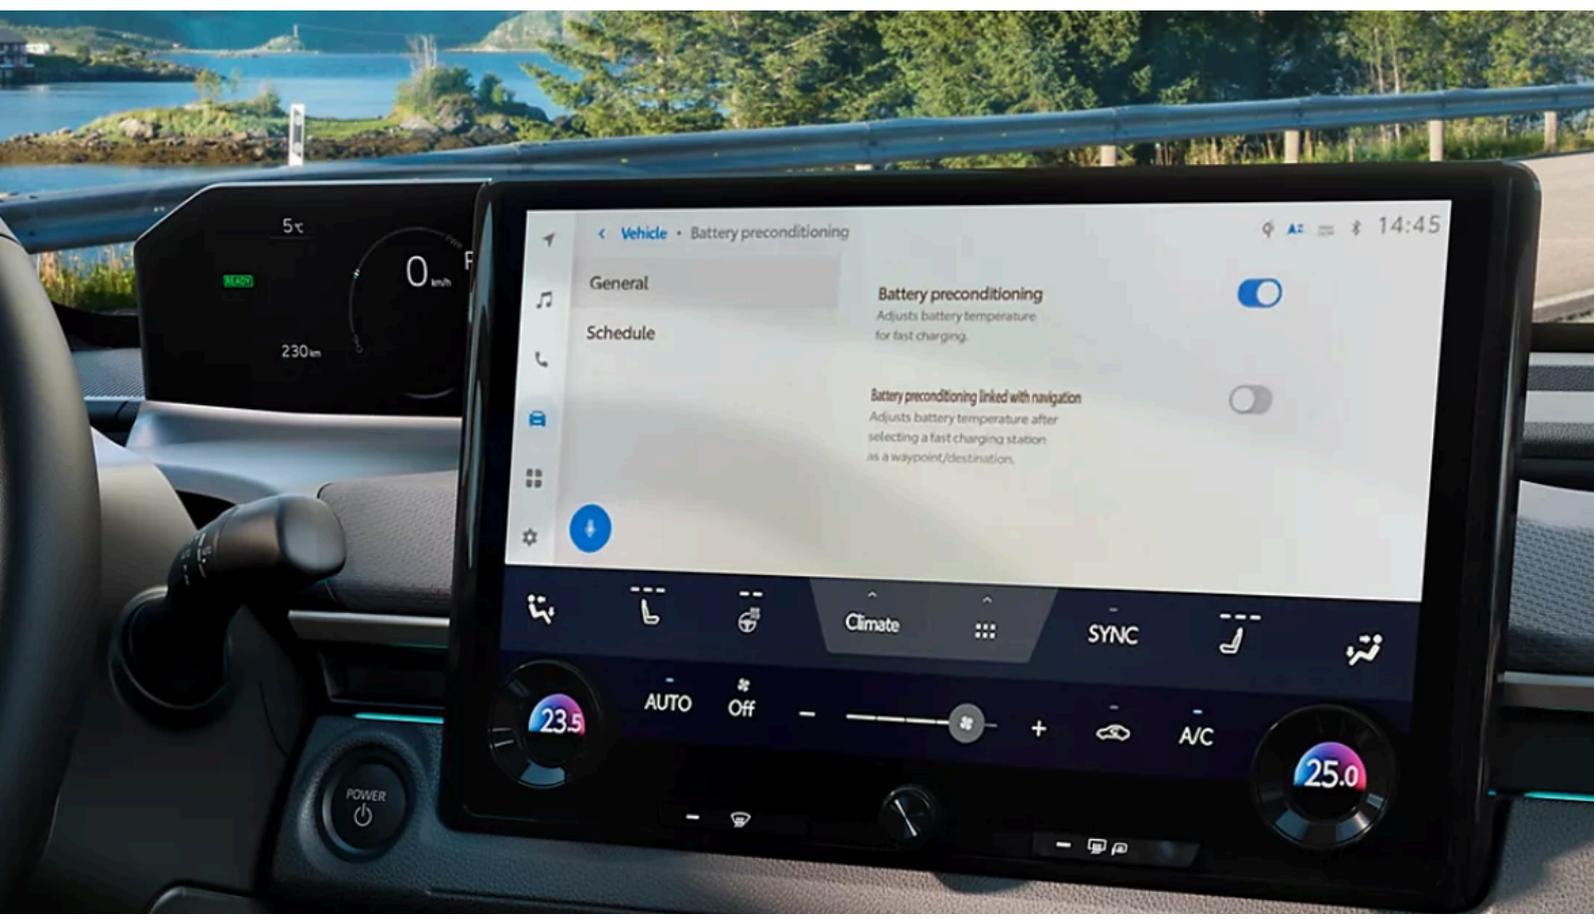

Automatically, if you set a DC fast-charging station as your destination, the system will begin warming the battery en route.

Through the MyToyota app, where you can also schedule it ahead of time.

By preparing the battery before you charge, preconditioning helps you spend less time waiting and more time driving.

BATTERY AND CHARGING

CHARGING 'PLUG AND PLAY'

Charging the Toyota C-HR+ is easy and safe, with multiple charging options to meet customer needs in every situation.

TOYOTA HOMECHARGE **EVERYDAY**

Toyota HomeCharge can be installed at customers' homes or offices for efficient AC charging:

Home 11kW OBC	8.3 hours (10-80%)	11hrs (10-100%)
Public 11kW OBC:	4.8hrs (10-80%)	7hr (10-100%)
Public 22kW OBC:	2.2hrs (10-80%)	3.5hrs (10-100%)

PUBLIC CHARGING STATIONS **ON-THE GO**

Using high-output (up to 150 kW) public DC chargers, customers can achieve a 0-80% charge in around 30 minutes*.

Public 11kW OBC:	4.8hr (10-80%)
Public 22kW OBC:	2.2hrs (10-80%)

*DC Charging time subject to local conditions. In order to ensure effective charging and preserve battery health, DC Fast charging power may be reduced after 3.8 sessions (0-80%) per 24-hour period.

HOUSEHOLD PLUG **IF NECESSARY**

Charging from a home socket is possible but takes considerably longer, up to 31 hours at 10A.

*Tested according to WLTP Regulations. EV Range varies according to environmental and internal factors

DISCOVER BATTERY ELECTRIC

Toyota's new generation of advanced Battery Electric vehicles deliver an uncompromising blend of power, reliability and performance. Our Battery Electric cars runs on electrical power alone and use no fuel for propulsion.

Charge at home

Charging your Toyota Battery Electric vehicle is safe, convenient and simple. Charge at home using the Toyota HomeCharge. You can also use rapid charging at a variety of public charging points.*

Exceptional range

Battery Electric vehicles such as the Toyota C-HR + can travel up to 606km ** on a single full charge.

Peace of mind

For peace of mind, the extended care programme guarantees the battery in your Toyota will retain 70% of its original capacity over the first 10 years of ownership or one million kilometres driven ***

* DC Fast Charging power of the Toyota Battery Electric cars may be reduced temporarily (for roughly 24 hours) after two sessions per day (equivalent of two times 10% to 80% state of charge).

** WLTP cycle for the C-HR+. This range figures are estimates based on official homologation figures in a controlled environment (WLTP). The actual electric range value of your vehicle will vary from these calculated values, since many factors have an influence on a car's electric range.

*** Subject to annual health checks at a Toyota authorised service centre.

ALWAYS ON THE GO, ALWAYS CONNECTED

The intelligent cockpit keeps everything in sync between your vehicle and smartphone. The MyToyota App, designed to enhance the driving experience, opens up a world of connectivity.

Depending on the model, the MyToyota App provides a suite of services that enable you to heat and cool your car using your smartphone, check your car's battery level, receive real-time updates, view trip history, and access to coaching features aimed at optimizing your driving performance, ensuring you get the most from your Toyota.

TOYOTA SAFETY SENSE

Toyota Safety Sense features a set of five active technologies with the ultimate goal being to reduce traffic accidents as much as possible, helping to create a safer driving environment for everyone, while supporting you in your daily journey.

Pre-Collision System

Recognizes a potential head-on impact and a wide range of objects in the car's path, including pedestrians, cyclists and motorcycles.

Lane Departure Alert

The lane-centring function will alert the driver if the vehicle starts to deviate from it's lane.

Automatic High Beam

Designed to optimise visibility during night driving by automatically switching between high and low beam for oncoming vehicles and leading traffic

Road Sign Assist

Monitors the road signs ahead, displaying useful information such as the current speed limit.

Adaptive Cruise Control

Drivers can choose their cruising speed at a pre-set distance from the vehicle in front. If this distance falls, the system will reduce it's speed.
