KEY ACCESSORIES

LAND CRUISER

WIND DEFLECTORS
Wind deflectors are ideal if you like to drive with the windows open. They are custom designed to match the aerodynamic contours of your vehicle and work by diverting air flow to ensure that you and your passengers are not troubled by excessive wind movement and noise

RUBBER FLOOR MATS
Genuine tailored fit rubber floor mats help protect your carpets against the very worst conditions. They are impervious to dirt, mud and water and can removed for easy cleaning.

TOWING HITCH
A genuine Toyota towbar provides a strong towing capability and is designed specifically for your vehicle

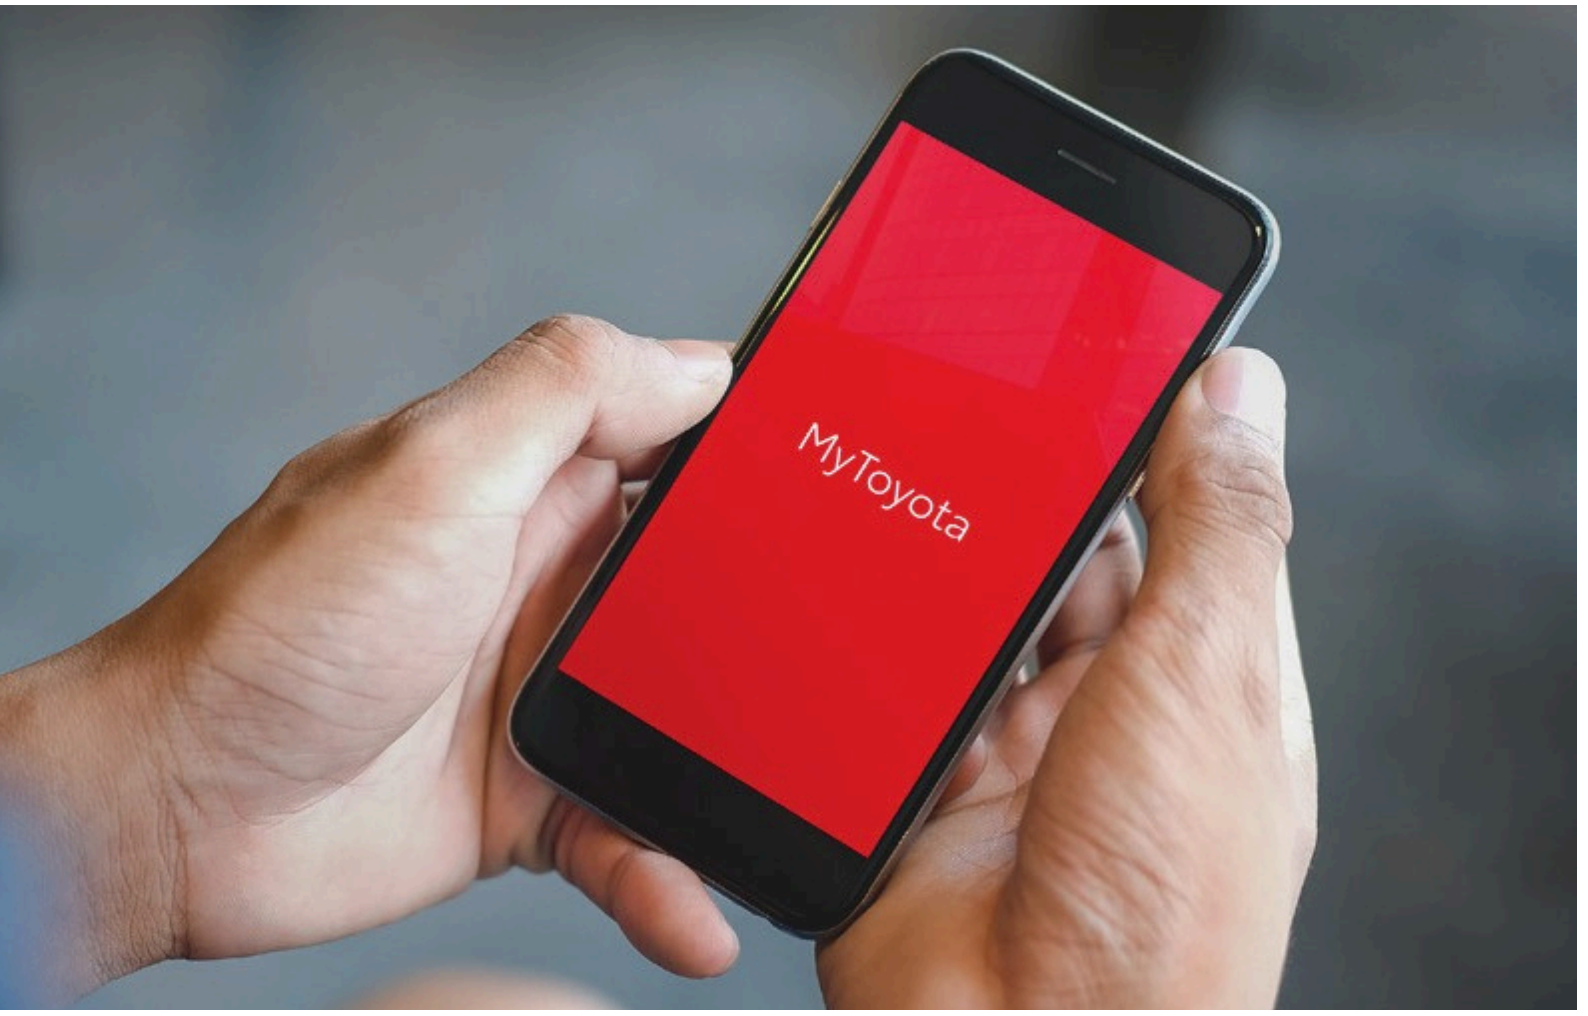
ALWAYS ON THE GO, ALWAYS CONNECTED

The intelligent cockpit keeps everything in sync between your vehicle and smartphone. The MyToyota App, designed to enhance the driving experience, opens up a world of connectivity.

Depending on the model, the MyToyota App provides a suite of services that enable you to heat and cool your car using your smartphone, check your car's battery level, receive real-time updates, view trip history, and access to coaching features aimed at optimising your driving performance, ensuring you get the most from your Toyota.



TOYOTA SAFETY SENSE

Toyota Safety Sense features a set of five active technologies with the ultimate goal being to reduce traffic accidents as much as possible, helping to create a safer driving environment for everyone, while supporting you in your daily journey.

Pre-Collision System
Recognizes a potential head-on impact and a wide range of objects in the car's path, including pedestrians, cyclists and motorcycles.

Lane Departure Alert
The lane-centring function will alert the driver if the vehicle starts to deviate from it's lane.

Automatic High Beam
Designed to optimise visibility during night driving by automatically switching between high and low beam for oncoming vehicles and leading traffic

Road Sign Assist
Monitors the road signs ahead, displaying useful information such as the current speed limit.

Adaptive Cruise Control
Drivers can choose their cruising speed at a pre-set distance from the vehicle in front. If this distance falls, the system will reduce its speed.
