DISCOVER HYBRID

Toyota has pioneered Hybrid technology for more than 25 years. Our Hybrid cars are enjoyed by millions of drivers on the road today. Toyota's latest fifth-generation Hybrids combine an electric motor and a petrol engine in one best-of-both-worlds powertrain, delivering impressive performance and driving range.

Why Hybrid?

Refuel as usual
Refuelling a Hybrid car is easy. Top up your Toyota Hybrid with petrol at a filling station, as you would a conventional car.

Responsive and efficient
Toyota Hybrids seamlessly combine petrol and electric power to optimise efficiency and deliver smooth, responsive power. They drive much like a conventional car but can cover up to 42% of your driving distance and 56% of your driving time in electric-only EV modes.

No Plugging In
Toyota Hybrids charge their batteries while braking and coasting. Together with their onboard combustion engine, this means you don't need to worry about electric range, and no need to plug in your car to charge.

ALWAYS ON THE GO, ALWAYS CONNECTED

The intelligent cockpit keeps everything in sync between your vehicle and smartphone. The MyToyota App, designed to enhance the driving experience, opens up a world of connectivity.

Depending on the model, the MyToyota App provides a suite of services that enable real-time updates, viewing trip history, and access to coaching features aimed at optimizing your driving performance, ensuring you get the most from your Toyota.

TOYOTA SAFETY SENSE

Toyota Safety Sense features a set of five active technologies with the ultimate goal being to reduce traffic accidents as much as possible, helping to create a safer driving environment for everyone, while supporting you in your daily journey.

Pre-Collision System
Recognizes a potential head-on impact and a wide range of objects in the car's path, including pedestrians, cyclists and motorcycles.

Lane Departure Alert
The lane-centring function will alert the driver if the vehicle starts to deviate from it's lane.

Automatic High Beam
Designed to optimise visibility during night driving by automatically switching between high and low beam for oncoming vehicles and leading traffic

Road Sign Assist
Monitors the road signs ahead, displaying useful information such as the current speed limit.

Adaptive Cruise Control
Drivers can choose their cruising speed at a pre-set distance from the vehicle in front. If this distance falls, the system will reduce it's speed.
